Seal A Hatch™

Insulated Attic Access Cover

Save up to 20% on HVAC Energy Costs by Air Sealing and Insulating your home.¹

Your energy bill is ONE bill you can control.²

ONLY \$149.95 PLUS SHIPPING

Seal and insulate one of the largest openings in your attic to save energy and reduce your energy bill. Seal A Hatch is an energy saving insulation cover that seals and insulates an attic access opening. The cover replaces your existing attic hatch panel with a durable prefabricated panel. The panel has a smooth white durable finish made of fiberglass reinforced plastic bonded to a fire resistant gypsum panel and one inch of high density extruded foam with a multilayer foam radiant barrier.

The radiant barrier attic side cover has aluminum facings that are 97% radiant heat reflective. The prefabricated panel has an **effective R-value of 13** along with a **superior magnetic sealing system** to virtually eliminate air leakage between the attic and home. The panel can be painted if desired, however, the smooth white surface never needs painting and can be cleaned easily with mild detergents and water.

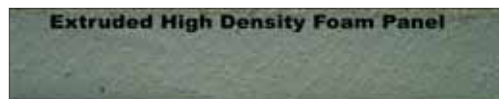

Seal A Hatch Prefabricated Panel Materials

Smooth Fiberglass Panel

Drywall Panel

Extruded High Density Foam Panel

Multilayer Polyethelene Foam

Aluminum Radiant Barrier
